

WHAT OTHERS SAY

"At IKEA, we want to take a leading role in the transition to a low-carbon society by only using 100 percent renewable energy. By only using wind power in Sweden [...] we will not only be self sufficient in electricity in Sweden, generating enough to supply all IKEA buildings and operations in the country, but it will give us opportunities to supply IKEA stores in other countries with wind power."

*Steve Howard,
Chief Sustainability Officer,
IKEA Group, June 2012*

"Variability and uncertainty are familiar aspects of all power systems."

*International Energy
Agency, 2011*

"Climate change poses the single greatest long-term threat to birds and other wildlife. Wind power is the most advanced renewable technology, available at a large scale, over this time period. The RSPB supports a significant growth in offshore and onshore wind power generation in the UK."

Royal Society for the Protection of Birds (RSPB)
