

Wind power targets

- Overall the EU is lagging by 1.6 GW (-1.5%) behind its 27 National Renewable energy Action Plan forecasts.
- Eighteen Member States are falling behind on their wind power capacity trajectories, most notably Slovakia, Greece, Czech Republic, Hungary, France and Portugal.
- Nine Member States are above their trajectory.
- Compared to EWEA's 2009 forecast, onshore installations are 3 GW above expectations (+3%). Offshore installations are below EWEA's expectations by 307 MW (-6%).
